2	Plots	2
1	setosa	1

1 setosa

The setosa species is subsetted from the data.

```
iris_filtered <- subset(iris, iris$Species == params$name)
head(iris_filtered)</pre>
```

```
Sepal.Length Sepal.Width Petal.Length Petal.Width Species
                                    1.4
1
           5.1
                       3.5
                                                0.2 setosa
2
